# What to Expect in This Module

Navigating between pages

Creating a master/detail relationship

Master/detail data binding

Tabbed display

Swipe-navigation with a carousel

# Summary

- `ContentPage` is the basic page type for displaying content
- `NavigationPage` provides navigation ability
  - It doesn't directly hold content but rather holds pages
- `MasterDetailPage` moves between summary and supporting pages
  - Master is implemented as a side pullout window
- `TabbedPage` displays a group of pages as selectable tabs
- `CarouselPage` displays a swipable group of pages
